

NGUYỄN NGỌC HÙNG LONG

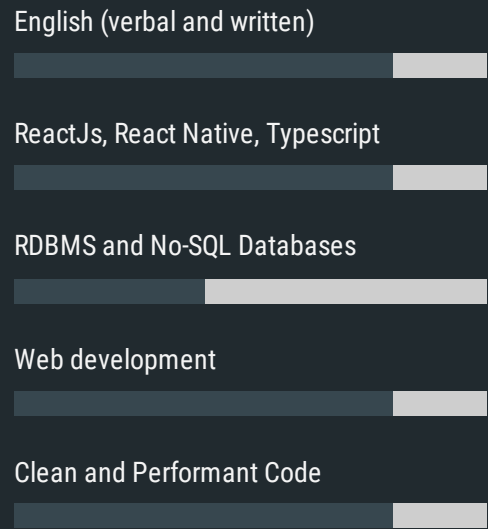

Software developer

- (+84) 929374896
- ng2hunglong@gmail.com
- Le Van Sy, District 3, Ho Chi Minh city
- 08/11/1995
- Male

Objective

- Work on a challenging project or system, gain experience, learn new things.

Skill

Interests

- Badminton
- Technologies: Bunjs, Docker, Gitlab CI/CD, Remix, Svelte, Linux, BashScript,

Summary

2+ years of experience as a full-stack developer (LAMP stack)
2 years of experience in cross platform mobile development with React Native.

Work experience

MOBILE DEVELOPER Oct 2021 - Jul 2023

Mfine - client of Tego Global

I built a feature from the ground up that reached 40k monthly active users as a front end engineer. My responsibilities were:

- Discussing the technical feasibility of new features with PM and designer.
- Planning the implementation strategy and estimating the time required to finish the features.
- Implementing the app analytics events to track the users' behaviors on the app.
- Implementing the code with high quality and reviewing others' pull requests in React Native team to improve the overall quality of the code base.
- Deploying the app to production and monitoring bug tracking tools to ensure my features ran well on production.
- Writing documentation about implementation strategy and release notes.

I worked from home effectively thanks to Agile methodology (We used Jira, Confluence, and BitBucket at Mine), and my proficiency with Git to resolve merge conflicts.

MOBILE DEVELOPER Oct 2021 - Jul 2023

Tego Global

I worked directly with Mfine's team to build a healthcare app.

FULL-STACK DEVELOPER Mar 2019 - May 2021

Dirox Digital Solutions

- Worked with LAMP stack to develop a finance website.
- Built the UI with smooth animation and perfect pixel across browsers.
- Represented data in tables and charts using Amcharts.
- Ran Cron job to send notifications to users.
- Designed and implemented MySQL database.

Certifications

- Back End development and APIs -
<https://freecodecamp.org/certification/ng2hunglong/back-end-development-and-apis>
- Oct 2021
- Front End development Libraries -
<https://freecodecamp.org/certification/ng2hunglong/front-end-development-libraries>
- Sept 2021
- Front End development Libraries -
<https://freecodecamp.org/certification/ng2hunglong/front-end-development-libraries>
- Sept 2021
- Javascript Algorithms and Data Structures -
<https://freecodecamp.org/certification/ng2hunglong/javascript-algorithms-and-data-structures>

PHP, JQuery, TailwindCSS, Reactjs,
Prettier, ESLint, Husky, Remix Run,
Prisma

Personal Projects

Full stack web app with Remix, Prisma, TailwindCSS, and MongoDB:
