

Nguyễn Ngọc Hùng Long

Front-end Engineer

☎ +84 929374 896 ✉ ng2hunglong@gmail.com 🔗 <https://ng2hunglong.dev> 📍 District 3, Ho Chi Minh city

SUMMARY

Hello, my name is Long. I have five years of experience in software development, with a wide range of skills. These include front-end technologies like **ReactJs**, **Nextjs**, **Redux**, **TailwindCss**, Framer Motion, and **Typescript**, cross-platform technology like React Native, and full-stack development like the LAMP stack and jQuery. I also have a strong passion for learning and applying new AI tools to improve my productivity.

But don't just take my word for it, check out my website and GitHub repository.

- Website: <https://ng2hunglong.dev> - This is a portfolio website that I built using **Nextjs**, Framer Motion, **TailwindCss**, and **Typescript**.
- Github: <https://github.com/NNHungLong>
- Kudos: <https://kudos-two.vercel.app/> - Sign up, login, search for a user and give Kudos. I developed this website using **ReactJs**, **Remix**, Google APIs, Prisma, MongoDB, **Radix-ui**, **TailwindCss**, and **Typescript**.

WORK EXPERIENCE

Tego Global

Oct 2021 - 2023

Front-end developer

I developed a feature that started as a Minimum Viable Product (MVP) and eventually reached over 40k monthly active users. I worked directly with my client's team at Mfine. My responsibilities included:

- Discussing the technical feasibility of new features with the Product Manager and designer.
- Planning the implementation strategy and estimating the time required to complete the features.
- Implementing app analytics events to track user behavior within the app.
- Writing high-quality code and reviewing pull requests from the React Native team to enhance the overall quality of the codebase.
- Deploying the app to production and monitoring bug tracking tools to ensure my features functioned well in production.
- Writing documentation about the implementation strategy and release notes.
- Guiding junior developers on my feature, reviewing their code, and providing feedback to improve overall code quality, performance, and error prevention.

Dirox

Mar 2019 - May 2021

Full-stack developer

I worked with the LAMP stack to develop a finance website. My responsibilities included:

- Building the UI with smooth animations and pixel-perfect design across various browsers.
- Representing data in tables and charts using Amcharts.
- Running a Cron job to send notifications to users.
- Designing and implementing a MySQL database.

CERTIFICATIONS

FreeCodeCamp - Back End Development and APIs:

Oct - 2021
